

FLYUX Prototype V2

Annotations for Developers & Stakeholders

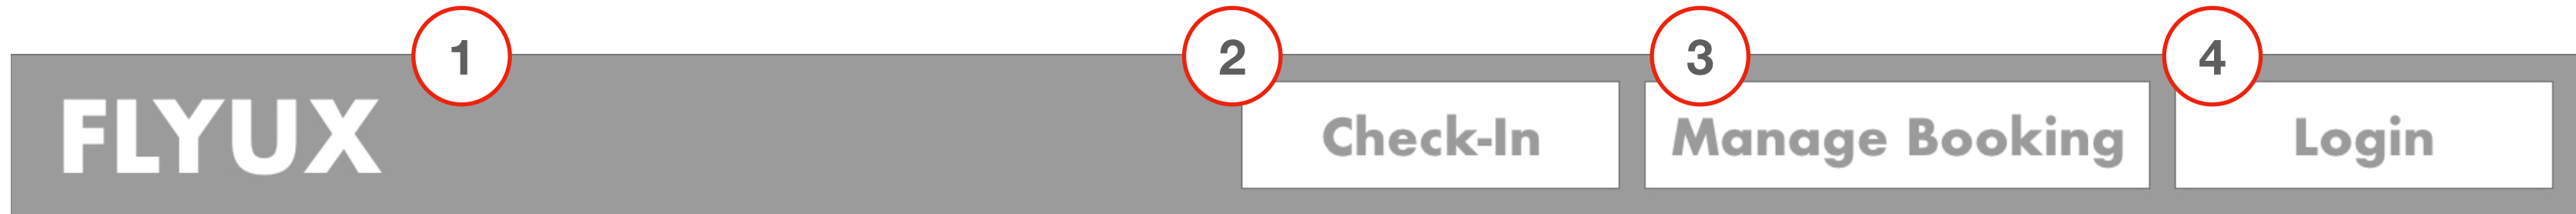

Key Points

- #23B439 (green) is for confirmations
- #11B5C3 (blue) is for hover functions to indicate to the user where they are
- As this is a desktop prototype, 'on selection' will always be referring to the action of the user clicking (this prototype will be adapted for tablet use and mobile use in later iterations)
- Actionable buttons are defined with shadowing to encourage the user to click (x =3, y=3, no blur)

Rachael Cole - 28/02/2021

Header and Footer

Both the Header and Footer remain static on all pages.

3

- Link to another page
- On hover: border highlight #11B5C3
- On selection: transition to 'Inspiration' page (NOT DESIGNED)

8

- Button function
- If all other field have been validated
 - Automatic border highlight #11B5C3
- On hover: border highlight #11B5C3
- On selection: Shadow change for 'indent' appearance
 - flash highlight #23B439
 - Transition to '2. Search Results - 1 - Departure Selection'
- If clicked before all other fields validated:
 - Error message overlay (8.1) (PAGE 10) :
 - "Please confirm all travel details such as locations, dates, passengers and flight class before searching for available flights."
 - Automatically close after 5 seconds

1

- Tab style selection between (1) & (1.2)
- On selection: background is highlighted in lighter colour.
- If other than (1.2) selected, background stays lighter colour as still selected.
- If (1.2) selected, background shaded darker and aligned behind selected tab.
- Field (2) border is highlighted (#11B5C3) and cursor is active in field.

1.2

- If other than (1) selected, background stays lighter colour as still selected.

2

- Text input field
- On selection of (1): cursor blinking in this field
 - Field highlighted, border #11B5C3
 - Guide text disappears on typing
- When user types 3 letters
 - If option **available**:
 - Dropdown menu of suggested airports based off 3 letters
 - Accommodate similar spellings
 - Auto-correct if spelled incorrect
 - Accept only letters
 - Option: On hover: border is highlighted (#11B5C3)
 - Option: On selection: menu collapses and option selected input into field
 - If option **not** available:
 - 'Error message' in style of drop down menu option
 - "Sorry we don't fly from there. How about...":
 - List alternative airports nearby
 - On hover: border highlights #23B439
 - On selection: menu collapses and option selected input into field
 - Small link as bottom option: 'I'm looking for inspiration'
 - On selection: transition to 'Inspiration' page (NOT DESIGNED)
 - When destination confirmed
 - Field border highlights #23B439
 - Field (2.2) is highlighted #11B5C3 and cursor blinking

2.1

- GPS location button
- On hover: GPS icon highlighted #11B5C3
- On selection:
 - If user location settings enabled:
 - Autofill field with nearest airport to user GPS
 - Field border highlights #23B439
 - Field (2.2) is highlighted #11B5C3 and cursor blinking
 - If user location settings not enabled:
 - Center of screen, slight blurred background
 - "Please allow location settings to be used to enable this function"
 - Auto time out after 2 seconds

2.2

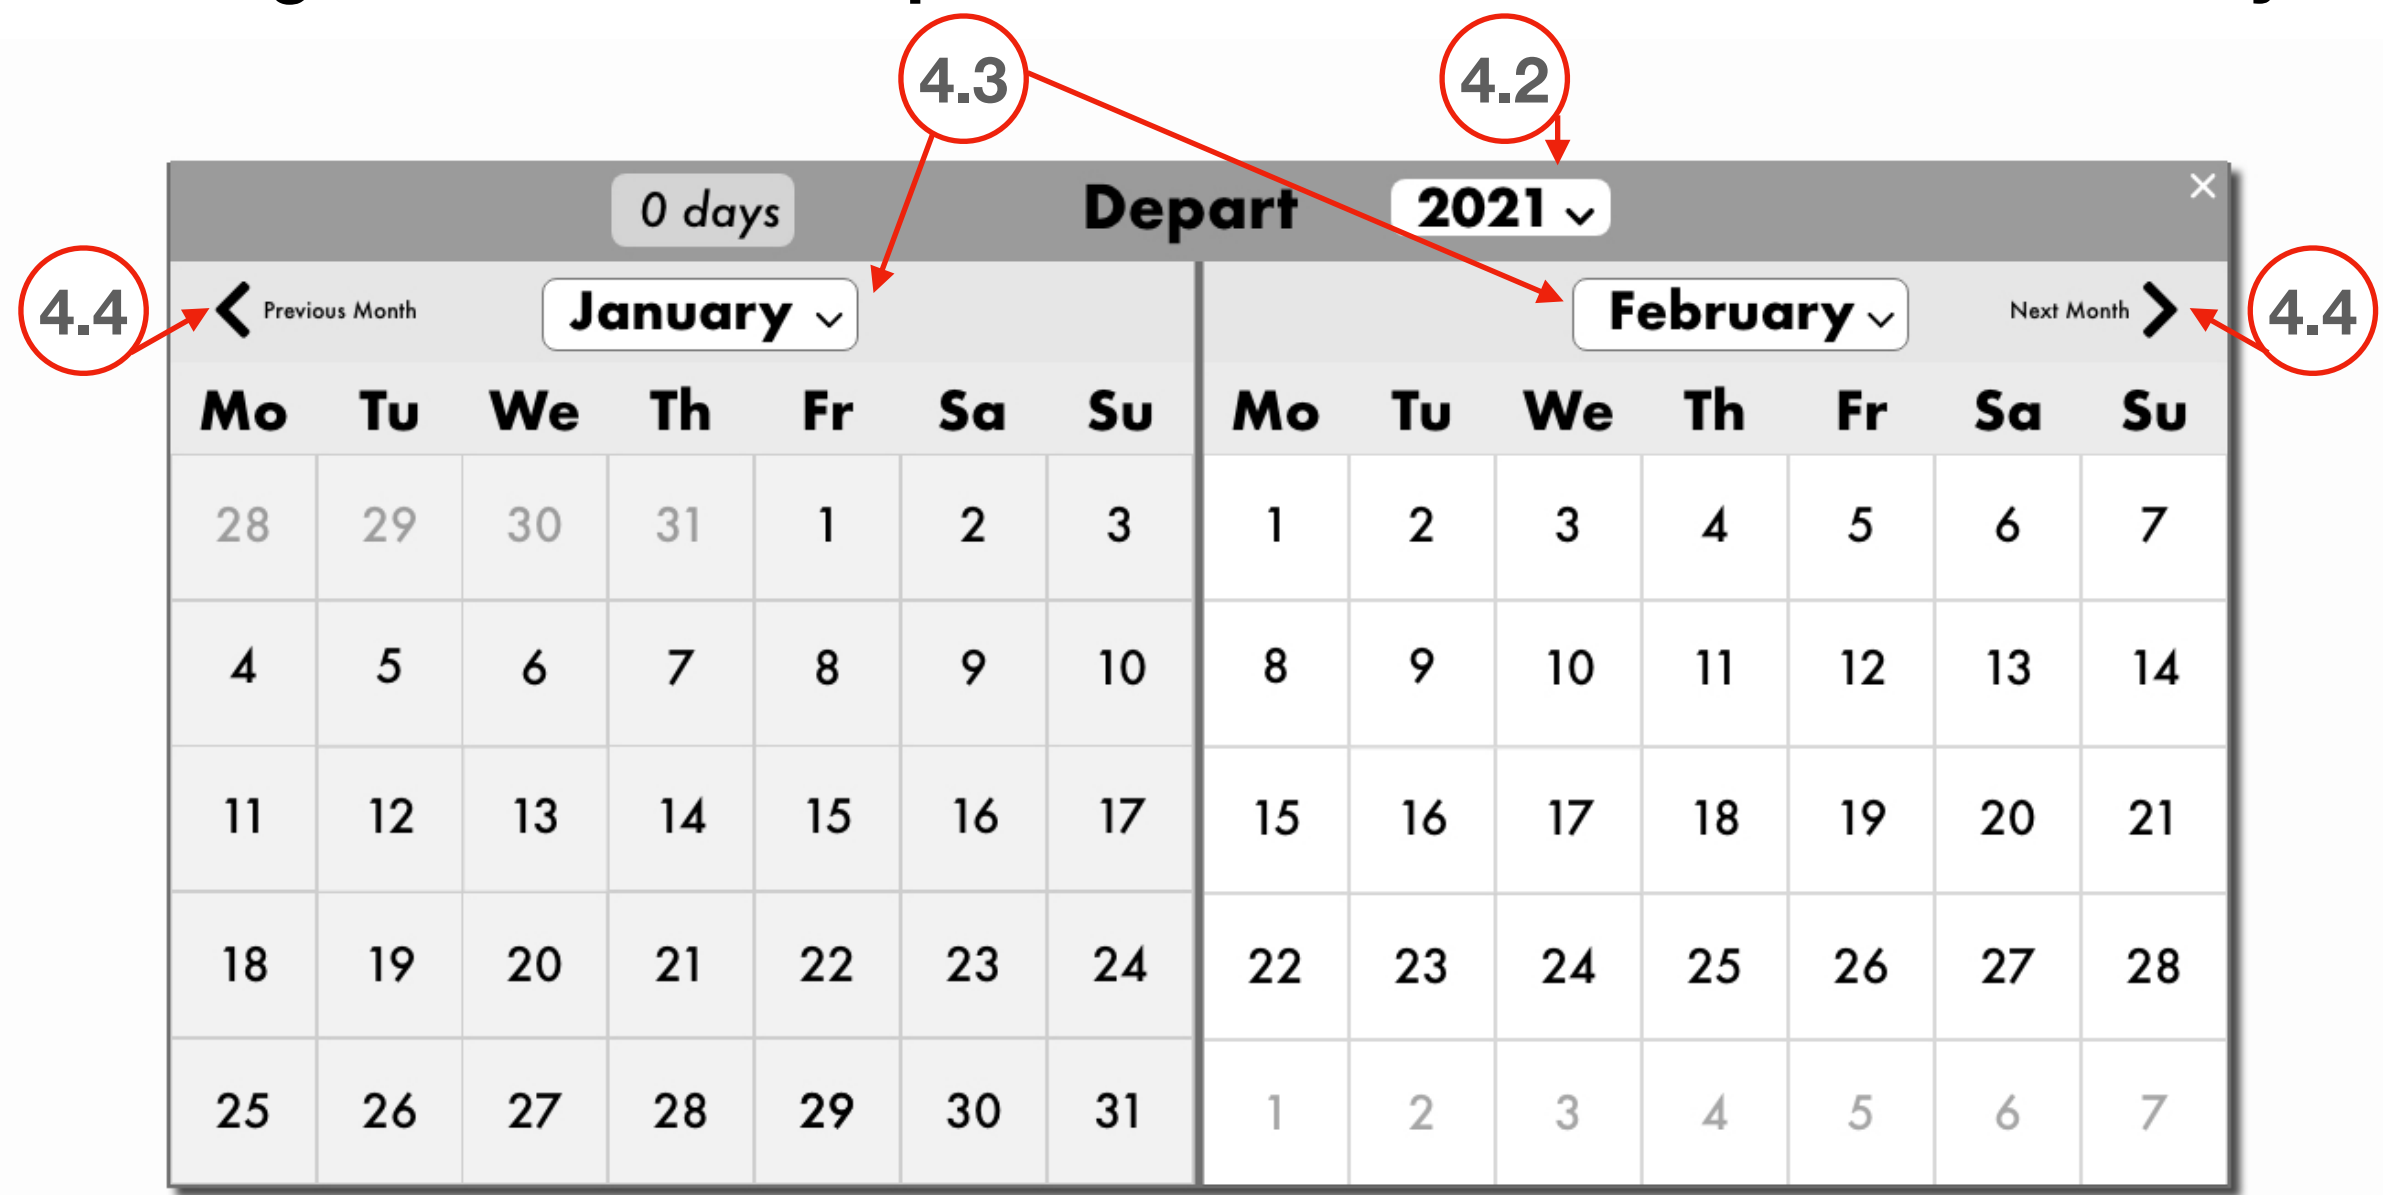

- Text input field
- If (2) has been validated:
 - Field highlighted, border #11B5C3
 - cursor blinking in this field
- Same selection and error behaviour as (2.1)

2.3

- Clickable
- On hover: highlight icon #11B5C3
- On selection: Switch (2) and (2.2) inputs (reverse 'To' and 'From' destinations)

4.1

1. Flight search - 1 - Departure Date Selection Calendar Overlay

4.1

- Interactive calendar
- Always 2 months to view
- Overlay in front of 'Flight Search' fields
 - Blurs background except for 'Flight Search' title, Header and Footer
- Calendar is not moveable
- On hover - dates: highlighted with dark circle as background
- On selection: dark circle stays on date selected and the circle border is highlighted #23B439
 - (4.5) changes to reference no. of days selected
 - Do not allow more than 1 date to be selected
- On validation: calendar automatically closes 3 seconds after date selection
 - Transition to validated (4) '1. Flight Search - 2 - Departure Date Selected'
 - Animation: fade back to '1. Flight Search - 2 - Departure Date Selected'
 - No change of screen, only change of state
 - (4) is autofilled with the chosen date
- If user clicks on 'x' in RH corner:
 - If date selected: Closes calendar and (4) is autofilled.
 - If no date selected: Closes calendar and (4) is not autofilled.
- If opened again from validated (4), ensure dates that were selected are still visible for the user's reference

Functionality stays the same on all calendars

4.2

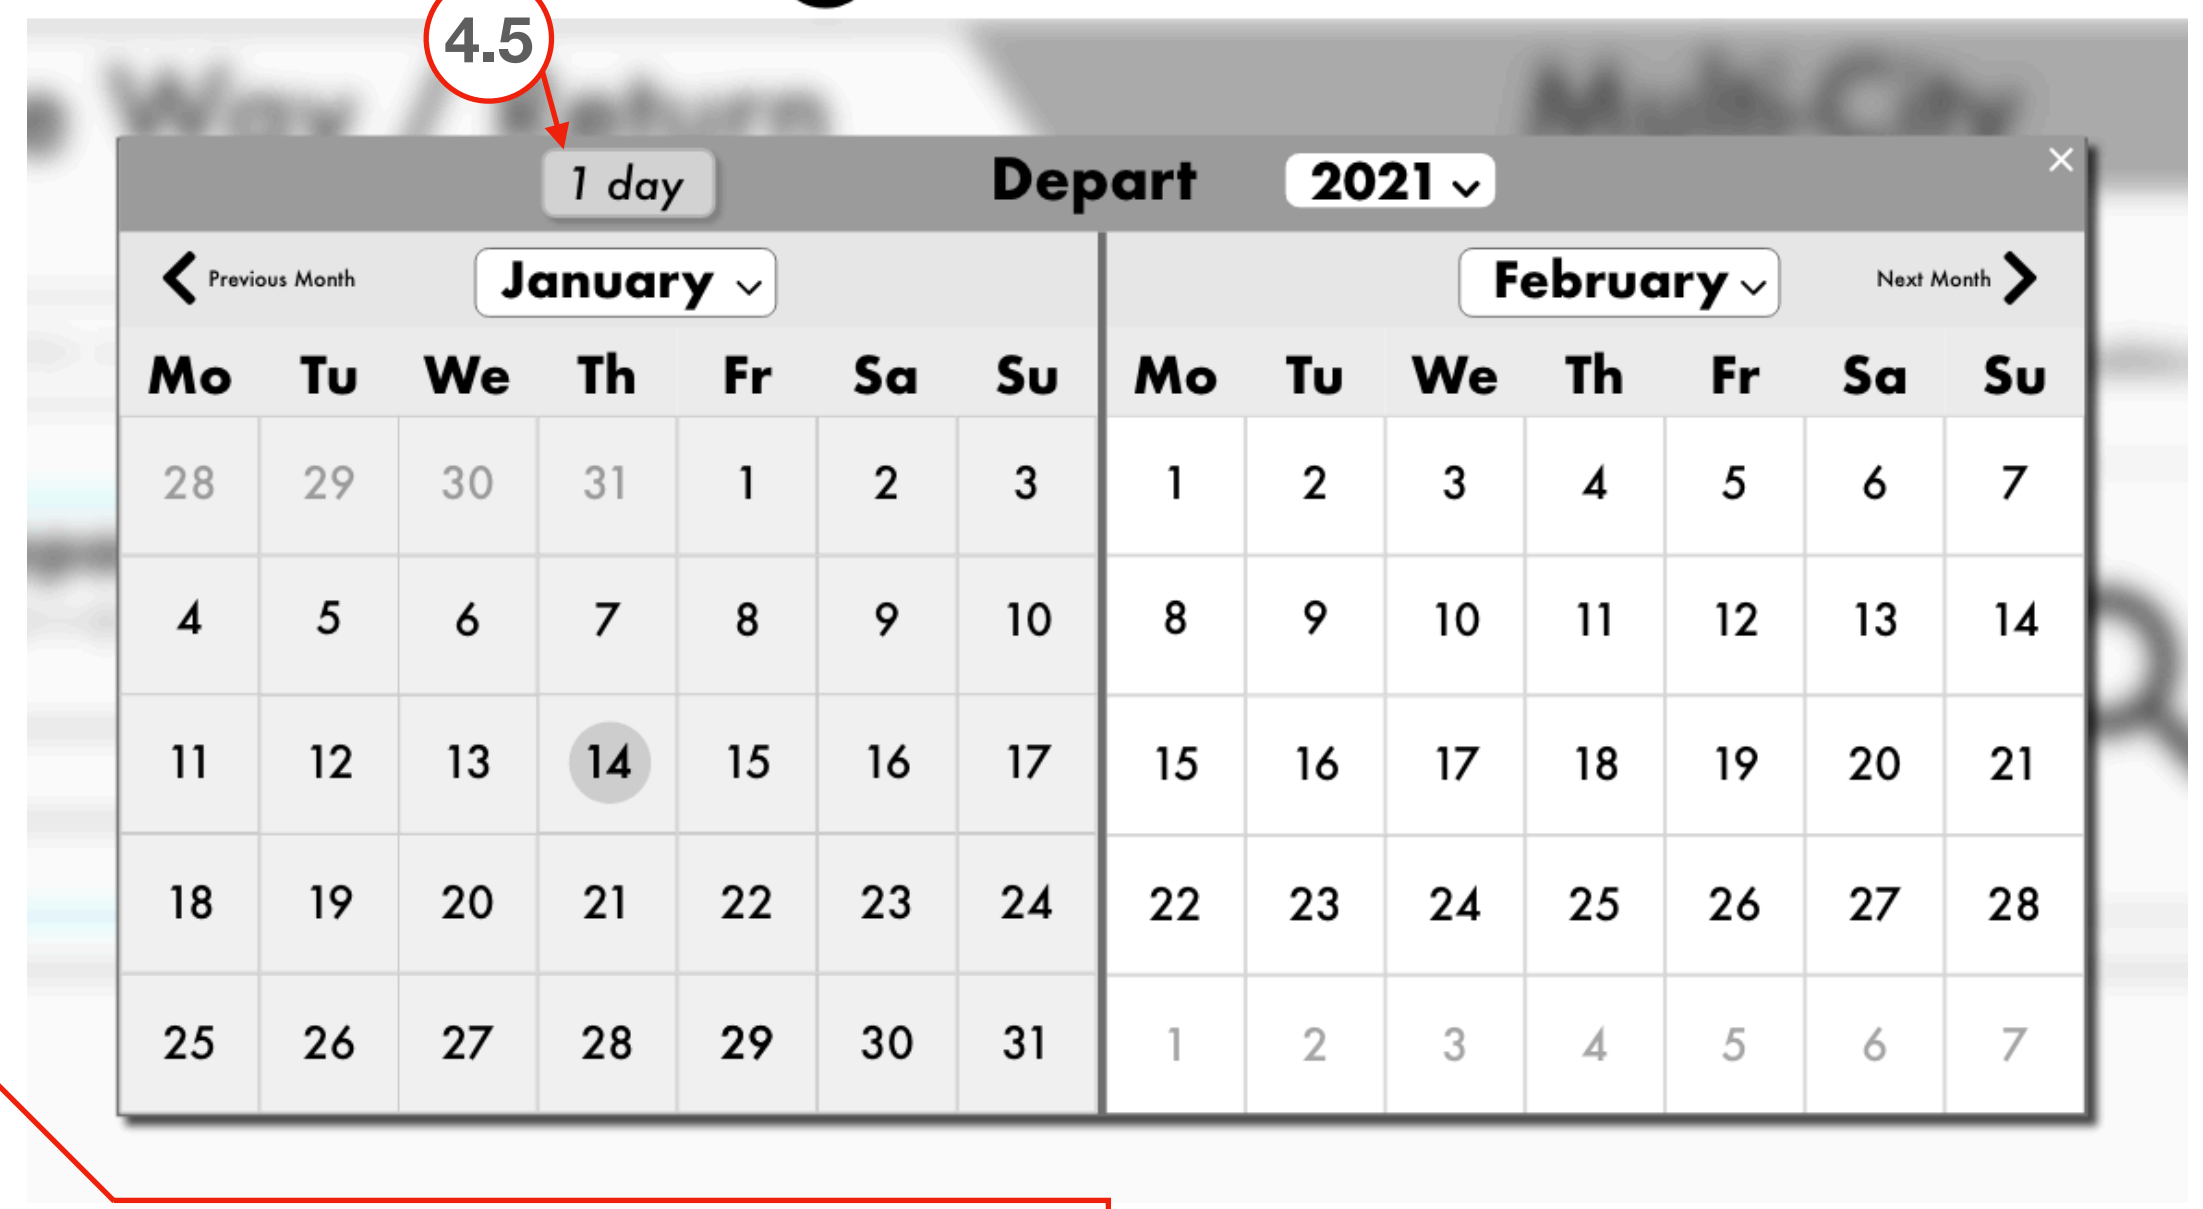

- Drop down menu
- Only show current year and next year
- Allows user to easily switch to next year if looking to book in advance
- On hover: highlight #11B5C3
- On selection: drop down menu with current year already in field
 - Chevron rotates 180 degrees to 'open' state
 - Option: on hover: highlight #11B5C3
 - Option: on selection: autofill field
 - Update calendar below to correct dates, keep months that user was looking at

4.3

- Drop down menu
- Automatically shows month of departure for date selected and following month
- Allows user to easily change to a later month without having to click through a lot of months
- On hover: highlight #11B5C3
- On selection: drop down menu with months in order Jan>Dec with current month automatically block filled #11B5C3
 - Chevron rotates 180 degrees to 'open' state
 - Animation: slide down
 - Option: on hover: highlight #11B5C3
 - Option: on selection: autofill field with selected month
 - Update calendar below to correct dates and days
 - Show following or preceding month depending on whether user has changed the first or second month displayed.
 - Animation: slide up

1. Flight Search - 1 - Departure Date Selection Calendar - Date selected

Flight search

4.4

- Click through arrows
- Allows user to click through to the next month to see different dates
- On hover: highlight #11B5C3
- On selection:
 - RH arrow
 - Moves the user on to the next month
 - Initial later month now becomes the month on the LH side (2 months to view)
 - Calendar updates to correct dates and aligns with days of the week
 - LH arrow
 - Moves the user to the previous month
 - Initial 'first' month now becomes the month on the RH side (2 months to view)
 - Calendar updates to correct dates and aligns with days of the week

4.5

- Not clickable
- Dependent on (4.1) interactions
- Shows how many days the user is travelling for
- As there is only 1 departure date this figure will always state '1 day'

1. Flight Search - 2 - Departure Date Selected

5.1 1. Flight Search - 2 - Return Date Selection Calendar Overlay

1. Flight Search - 2 - Return Date Selection Calendar - Date Selected

Flight search

5.1

- Interactive calendar
- Title has changed to 'Return'
- Always 2 months to view
- Overlay in front of 'Flight Search' fields
 - Blurs background except for 'Flight Search' title, Header and Footer
- Calendar is not moveable
- Departure date (4.1) is already highlighted based on selection
- (4.5) is automatically '1 day' as departure date selected
- On hover - dates: highlighted with dark circle as background and in-between dates also highlighted with light shade background to show the days the user is travelling over
- On selection: dark circle stays on date selected and the circle border is highlighted #23B439
 - (4.5) changes to reference no. of days travelling
 - Do not allow more than 1 return date to be selected
 - Dates in-between departure and return have background highlighted in a continuous form to indicate the days the user will be away for.
 - Lighter shade background that slightly obscures/fades dates travelling for
- On validation: calendar automatically closes 3 seconds after date selection
 - Transition to validated (4) & (5) '1. Flight Search - 3 - Return Selected'
 - Animation: fade back to '1. Flight Search - 3 - Return Selected'
 - No change of screen, only change of state
 - (5) is autofilled with the chosen date
 - (5) border is highlighted #23B439
 - (6) border is highlighted #11B5C3
- If user clicks on 'x' in RH corner:
 - If date selected: Closes calendar and (5) is autofilled.
 - If **no** date selected: Closes calendar and (5) is not autofilled.
- If opened again from validated (5), ensure dates that were selected are still visible for the user's reference

Same functionality as '1. Flight search - 1 - Departure Date Selection Calendar Overlay'

4.2

- Drop down menu
- Only show current year and next year
- Allows user to easily switch to next year if looking to book in advance
- On hover: highlight #11B5C3
- On selection: drop down menu with current year already in field
 - Chevron rotates 180 degrees to 'open' state
 - Option: on hover: highlight #11B5C3
 - Option: on selection: autofill field
 - Update calendar below to correct dates, keep months that user was looking at

4.3

- Drop down menu
- Automatically shows month of departure for date selected and following month
- Allows user to easily change to a later month without having to click through a lot of months
- On hover: highlight #11B5C3
- On selection: drop down menu with months in order Jan>Dec with current month automatically block filled #11B5C3
 - Chevron rotates 180 degrees to 'open' state
 - Animation: slide down
 - Option: on hover: highlight #11B5C3
 - Option: on selection: autofill field with selected month
 - Update calendar below to correct dates and days
 - Show following or preceding month depending on whether user has changed the first or second month displayed.
 - Animation: slide up

4.4

- Click through arrows
- Allows user to click through to the next month to see different dates
- On hover: highlight #11B5C3
- On selection:
 - RH arrow
 - Moves the user on to the next month
 - Initial later month now becomes the month on the LH side (2 months to view)
 - Calendar updates to correct dates and aligns with days of the week
 - LH arrow
 - Moves the user to the previous month
 - Initial 'first' month now becomes the month on the RH side (2 months to view)
 - Calendar updates to correct dates and aligns with days of the week

4.5

- Not clickable
- Dependent on (5.1) interactions
- Shows how many days the user is travelling for

- 1**
- Progress bar
 - Clickable
 - Auto-updates with information as the user progresses through the booking process such as flights selected, luggage added and seats selected.
 - Auto highlights border with #11B5C3 when on relevant page
 - Flights = when user selecting departure and return flights
 - Add baggage = when user is on the add baggage page
 - Seat selection = when user is on the seat selection pages
 - etc.
 - When the relevant page has been completed and the user has moved to the next step the border highlights #23B439 to confirm that step is complete.
 - On hover: bold highlighting of border #11B5C3
 - On selection: user transitions to relevant page
 - If information has been input e.g. added baggage, this is viewable to the user
 - The user can skip adding baggage and seat selection.
 - The user cannot skip Passenger Details, Payment or Confirmation. These pages must be progressed through in stated order and fully validated.

- 2**
- Button that allows user to change the flight route
 - On hover of 'Change': highlight border #11B4C3
 - On selection: user transitions to '1. Flight Search - 3 - Return Selected' with all validated inputs visible

- 3**
- Tab style dates
 - Fixed scrolling position
 - Shows the user a week-to-view of possible flight options (+/- 3 days either side of selected departure date).
 - Prices and no. of flights available shown
 - On hover of tab: highlight border #11B4C3
 - On selection: tab is greyed to same colour as (5) to indicate that is the day the user is looking at
 - No scrolling of subsequent days - remain on current week-to-view
 - Flight information beneath updates to reflect change in date and availability.
 - During loading time of this information, greyed out lines are to be displayed
 - Information always displayed with Direct flights first and in most relevant flight order i.e. closest match to user search

- 4**
- Click through arrows
 - Fixed scrolling position
 - Allows user to click through to the next week to see different dates
 - On hover: highlight icon #11B5C3
 - On selection:
 - RH arrow
 - Moves the user on to the next week
 - Calendar updates to correct dates and days of the week
 - During loading time of this information, greyed out lines are to be displayed
 - LH arrow
 - Moves the user to the previous week
 - Calendar updates to correct dates and days of the week
 - During loading time of this information, greyed out lines are to be displayed
 - The middle date of the week will always be initially highlighted

- 5**
- Buttons that allows user to filter the flights according to their preference
 - Fixed scrolling position
 - On hover: highlight border #11B5C3
 - On selection: Flight information changes order to suit
 - Price selected:
 - Flights are kept in categories of 'Direct' and 'Indirect'
 - Flights are automatically sorted cheapest at the top, most expensive towards the bottom of the page (within categories)
 - Duration selected:
 - Flights are kept in categories of 'Direct' and 'Indirect'
 - Flights are automatically sorted shortest travel total travel time at the top, longest towards the bottom.
 - Direct selected:
 - Flights are kept in categories of 'Direct' and 'Indirect'
 - Indirect flight options collapse to form a small drop down menu

- 6**
- Drop down menu that displays further flight information including different flight classes, their benefits and their costs
 - Price shown is dependent on class selected in search
 - On hover: border highlight #11B5C3
 - On selection: Drop down menu of options (6.1) (PAGE 10)
 - Field border #11B5C3
 - Chevron flip 180 degree
 - Animation: slide down
 - If user clicks on the (6) field or chevron again the drop down collapses and (6) reverts to default
 - Price options: on hover: field border is highlighted #11B5C3
 - User clicks on price of class they would like:
 - (7) populates with total cost of flights selected so far
 - (6) Chevron flip 180 degree (original position)
 - (6) Border highlight #23B439
 - (6) Populates with price of flight chosen
 - Page auto transitions to '2. Search Results - 2 - Return Selection'
 - Obvious slide transition to help user understand the page has changed

- 7**
- Not clickable but can hover
 - To show the user the total cost of all the options selected so far
 - Dependent on other components such as (6)
 - Auto populates and updates
 - On hover: Breakdown of prices appears above the field

£25

- 1** - 'i' icon interactive
 - On hover: highlights #11B5C3
 - Information explaining the total baggage allowance they will have if they choose this option e.g. 20kg + 10kg = 30 kg total
 - Appears just above 'i' to RH side
 - It is also indicated whether this would still be 1 piece of luggage or an extra bag's worth
- 2** - Prices displayed for the different baggage options the user can select
 - On hover: highlights #11B5C3
 - On selection: border highlights #23B439
 - (6) updates to show total price of luggage selected (auto population)
 - If user selects validated price button again, it deselects and returns to default
- 3** - A 'nickname' field that allows the user to put a personal reference beside the luggage selected so they can keep track of each person's details before they have to input any official passenger details
 - On hover: highlights #11B5C3
 - Guide text disappears when user starts typing
 - Letters and numbers only allowed
 - Maximum of 10 characters
 - Validation: when user clicks off the field or clicks another field
 - Border defaults to grey
- 4** - An option that allows the user to apply the same luggage allowance to both of their flights for continuity
 - On hover: highlights #11B5C3
 - Greyed out 'tick' appears
 - On selection: border highlights #23B439
 - 'tick' fills in with #23B439
 - (6) updates to show total price of luggage selected (auto population)
 - If user selects validated button again, it deselects applying the baggage to both flights and (6) updates accordingly
- 5** - Confirm button to confirm the selection and allow the user to see a summary of their selection
 - On hover: highlights #11B5C3
 - On selection: border highlights #23B439
 - Transition to '3. Add Baggage - 2 - Baggage Selected'
 - Animation: Fade in/out
- 6** - Not clickable but can hover
 - To show the user the total cost of all the baggage options selected
 - Dependent on other component (2)
 - Auto populates and updates
 - On hover: Breakdown of prices appears above the field
- 7** - Allows user to close window
 - On hover: highlight icon #11B5C3
 - On selection: transitions user back to '3. Add Baggage - 1'
 - Unless 'Confirm button' is validated, details are not saved.
 - If user returning having previously confirmed selection, if they click here they will not loose their selection and transition back to '3. Add Baggage - 2 - Baggage Selected'
